Opinion about the DALLOP NM product

Hereby I inform that I have implanted 7 DALLOP NM tapes by TRICOMED for the treatment of effort incontinence in women.

I have placed the tapes both by the retropubic and transobturator approach. Both methods with the application with the above-mentioned product are performed easily – the set is ergonomic. The only limitation is the need to have few reusable guide wires.

Yours sincerely,

Professor Włodzimierz Baranowski, M.D. Ph.D.

Head of the Gynecology and Oncological Gynecology Clinic
